EDUCATION

Ambalika Institute of Management and Technology, AKTU 2023 – 2027
Bachelor of Technology in Computer Science and Engineering CGPA: 7.68 / 10 (through Semester V)

PROFESSIONAL SUMMARY

Python developer with hands-on experience designing and building backend systems, REST APIs, and SQL-driven database architectures using Python, Flask, and PostgreSQL. Strong foundation in Object-Oriented Programming (OOP), Data Structures, Algorithms, and debugging, with a consistent focus on clean code, performance optimization, and version-controlled development using Git. Built and shipped 5 Python and full-stack projects spanning API integration, authentication, and database design. Seeking a Python Developer Internship to apply backend engineering fundamentals to real-world, production-grade systems.

SKILLS

Languages: Python, SQL, JavaScript, TypeScript, C++ (Fundamentals), HTML5, CSS3

Backend Development: Python, Flask, REST APIs, REST API Development, API Integration, Node.js, Express.js, JWT Authentication, Google OAuth 2.0

Database: PostgreSQL, SQL, Database Design, MongoDB, MongoDB Atlas, Mongoose ODM, Supabase, NoSQL & Relational Database Design, Data Modeling

Core CS & Problem Solving: Object-Oriented Programming (OOP), Data Structures, Algorithms, Debugging, Clean Code, Performance Optimization, Analytical Thinking

Frontend: React.js, Next.js, Vite, Tailwind CSS, Responsive Web Design

AI & Automation: Generative AI, Prompt Engineering, RAG Fundamentals, OCR Processing, PDF Processing, Gemini API Integration, Process Automation

Tools & Platforms: Git, GitHub, VS Code, Vercel, Render

PROJECTS

Harmony Hub [Github](#)

Tech Stack: Python, Flutter, WebSockets, Real-Time Communication

- Engineered a Python-based WebSocket server enabling real-time, bidirectional messaging across cross-platform clients.
- Designed a modular backend architecture separating connection handling, message routing, and business logic for maintainability and scalability.
- Implemented concurrent session handling to support low-latency, real-time communication between multiple connected clients.

News Aggregator CLI [Github](#)

Tech Stack: Python, Requests, BeautifulSoup, NewsAPI, SQLite, CSV, JSON

- Built a Python command-line tool integrating the NewsAPI with a BeautifulSoup web-scraping fallback for resilient data retrieval.
- Processed and persisted aggregated data in SQLite, with structured export support to CSV and JSON formats.
- Implemented error handling and retry logic to maintain reliability during API failures and network interruptions.

Hairdrama Task Manager [Github](#) , [Live](#)

Tech Stack: Python (Flask), TypeScript, Next.js, Supabase (PostgreSQL), Resend, Vercel, Render

- Built REST APIs with Flask to power task assignment, progress tracking, and automated notification workflows for cross-functional teams.
- Designed and managed scalable PostgreSQL database schemas in Supabase, supporting multi-user, role-based data models.
- Implemented Google OAuth 2.0 authentication with role-based access control, securing backend endpoints and permission scopes.
- Automated email notification pipelines via Flask REST APIs and Resend, reducing manual follow-up on task events.

CSV Importer [Github](#) , [Live](#)

Tech Stack: Python, Flask, PostgreSQL, CSV Processing, REST APIs, Data Validation

- Engineered a robust Python-based CSV import pipeline to parse, validate, clean, and process large datasets with business-rule enforcement.
- Developed modular backend logic for schema validation, duplicate detection, error handling, and data transformation, improving import reliability.
- Built RESTful APIs to automate CSV upload, validation, and database insertion workflows while maintaining data integrity.
- Optimized import performance with efficient parsing and structured validation, reducing processing time for bulk data ingestion.

ACHIEVEMENTS / CERTIFICATIONS

- MongoDB Overview: Core Concepts and Architecture — MongoDB (Credly), 2026
- Full Stack Web Development Workshop — SoftPro India Computer Technologies Pvt. Ltd., 2025
- Claude Code: The Coding Assistant — Analytics Vidhya, 2026
- Generative AI with AWS — Analytics Vidhya, 2026

POSITIONS OF RESPONSIBILITY

Social Media Head, IEEE Student Branch: Led digital outreach, social media engagement, and cross-functional promotion of technical events for the IEEE student community.

IEEE Student Member: Active participant in professional development and technical networking activities.
