EDUCATION

Ambalika Institute of Management and Technology, AKTU
Bachelor of Technology in Computer Science and Engineering

2023 – 2027
CGPA: 7.68 / 10 (through Semester V)

SKILLS

Languages: Python, JavaScript, TypeScript, C++ (Fundamentals), HTML5, CSS3

Core CS & Problem Solving: Data Structures, Object-Oriented Programming (OOP), SQL, Debugging, Problem Solving, Analytical Thinking

Frontend: React.js, Next.js, Vite, Tailwind CSS, Framer Motion, React Router DOM, Responsive Web Design, PWA

Backend: Node.js, Express.js, Flask, REST API Development, JWT Authentication, Google OAuth 2.0

Database: MongoDB, MongoDB Atlas, Mongoose ODM, PostgreSQL, Supabase, SQL, NoSQL Database Design, Data Modeling

AI & Automation: Generative AI, Prompt Engineering, RAG Fundamentals, Vector Search, OCR Processing, PDF Processing, Gemini API Integration, Process Automation

Tools & Platforms: Git, GitHub, VS Code, Vercel, Render

PROJECTS

Hairdrama Task Manager github.com/kartikshukla2301-eng/Hairdrama-Task-Manager

Tech Stack: Next.js, TypeScript, Supabase, Flask, Resend, Vercel, Render

- Engineered a production-grade full-stack task management platform using Next.js, TypeScript, Supabase and Flask, streamlining workflows for cross-functional teams.
- Implemented Google OAuth 2.0 authentication with role-based access control, enabling secure task assignment, progress tracking and workflow optimization.
- Automated email notification pipelines via Flask REST APIs and Resend, reducing manual follow-up for task assignment and completion events.
- Designed and managed scalable PostgreSQL database schemas in Supabase to support multi-user task and data management.
- Deployed production-ready frontend on Vercel and backend on Render with secure environment configuration and clear technical documentation.

AI Study Assistant github.com/kartikshukla2301-eng/ai-study-assistant

Tech Stack: React 19, Vite, Tailwind CSS, Node.js, Express.js, MongoDB Atlas, JWT Auth, Google OAuth, OCR

- Architected a scalable full-stack AI learning platform using React 19, Node.js and MongoDB Atlas, unifying OCR-based document intelligence with AI-powered learning workflows.
- Engineered OCR-powered PDF intelligence to extract, parse and process educational content from uploaded documents.
- Implemented secure authentication using JWT and Google OAuth 2.0, safeguarding user sessions and account management.
- Developed 10+ AI-powered study features, including a Chat Assistant, 7-Mark Answer Generator, Notes Generator and Exam Kit Mode.
- Designed scalable RESTful APIs for PDF ingestion, OCR processing and chat history management, enabling data-driven, personalized learning workflows.
- Built as a mobile-first PWA with responsive design, multiple themes and seamless cross-device accessibility.

Ultra AI Chatbot github.com/kartikshukla2301-eng/UltraAi-Chatbot

Tech Stack: Python, Tkinter, Google Gemini API, PyInstaller

- Integrated the Google Gemini API to power natural language conversation and context-aware response generation within a desktop chatbot.
- Built desktop automation capabilities using Python and Tkinter, delivering a modern dark-themed GUI for responsive, real-time user interaction.
- Packaged the application as a standalone Windows executable using PyInstaller, enabling dependency-free installation and distribution.

ACHIEVEMENTS / CERTIFICATIONS

- MongoDB Overview: Core Concepts and Architecture — MongoDB (Credly), 2026
- Full Stack Web Development Workshop — SoftPro India Computer Technologies Pvt. Ltd., 2025
- Claude Code: The Coding Assistant — Analytics Vidhya, 2026
- Generative AI with AWS — Analytics Vidhya, 2026

POSITIONS OF RESPONSIBILITY

Social Media Head, IEEE Student Branch: Led digital outreach, social media engagement and cross-functional promotion of technical events for the IEEE student community.

IEEE Student Member: Active participant in professional development and technical networking activities.
